# GT-JET 64 & 256

Product Description

The GT-JET 64 and 256 inkjet printers are based on DOD Technology from Spectra. The GT-JET SG 256 is a very compact fully integrated printer. No base unit is required as all the electronics are integrated in the head itself. With 1" Print width at 300 dpi the 256 is ideal for small print high demand jobs. The GT-JET 64 has been used in the Card, Mailing, Tag, and Label industries for years. It is based on the S-Class Spectra (Fuji-Dimatix) Technology and prints 2.4" at 316x316dpi. Each model is ready to print in 5 minutes and can be operated with UV and Solvent Inks. Each can be used to print on a variety of materials such as paper, coated paper, foils, plastic cards, and more.

High Quality

The 256 provides up to 400 DPI in X and Y direction. Flexible resolution according to job requirements. High resolution means small printing width, low resolution means bigger print width. The 64 can also print at higher resolutions up to 500dpi. Each model is available in 30pl and 80pl models Driven by the most widely used system controller, the Graph-Tech MIC. Variable Barcodes and Variable Text easily setup and printed at high speed. Fixed and Variable bitmaps in nearly any format

Why GT-JET

Proven Reliability and Low Cost of Ownership
WYSIWYG Interface for ease of use
Swiss Built Durable High Speed Inkjet
Variable resoulution, Proven Technology

Inks

GTUS Manufactures Certified UV and Solvent Inks for use with the TurboJets. Customers enjoy better adhesion, better image quality, and longer printhead life with GTUS Inks.
