

Solutions for your K100, K200, 3010, 3025, GT-72, GT-64 and more.

Service Solutions - From Drop-On-Demand Pioneers

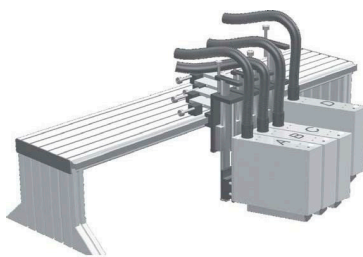

•**Service & Parts:** GTUS® provides installation and service to support your Drop-on-Demand Inkjet systems at competitive prices. Our experienced technicians are available for on-site and remote support of your K100, K200, 3010, 3025, GTJET-72, and GTJET-64 print systems. We support many customers in the label, tag, card, and packaging industry and manage a large inventory of spare parts for your print systems and peripheral devices.

•**Training:** We provide additional second level training on your inkjet systems and controllers to give your operators and top technicians the tools to handle routine troubleshooting, unique applications and products, and increased productivity.

•**Inkjet Refurbishment:** Tired of those expensive Inkjet repair bills and extensive delays? We provide the same inkjet refurbishment services as your current provider at a fraction of the cost with less down time. We also offer spare inkjets for quick response, no more down time.

Ink Solutions - Manufacturer and Customer Certified

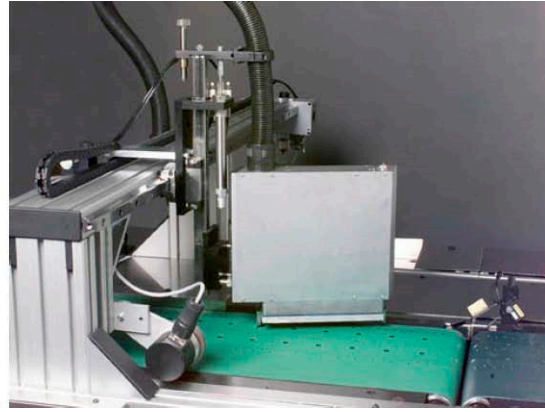

•**Maintenance Savings:** GTUS® inks are engineered for optimal system performance, and utilize the narrowest particle size distribution of colorants in the industry. With reduced nozzle drop out and less purging users experience savings in the form of less ink wasted, and less frequent repairs.

•**Variety of Ink Products:** We offer LED curable inks, Traditional UV inks, Aqueous Inks, and Solvent Inks in Black, White, Clear, CMYK and Spot Colors. GTUS® offers ink solutions for Spectra, Kyocera, Konica Minolta, Xaar, and other inkjet systems. All of our inks are made in the USA, and created with the same holistic design approach creating continuity within our vast product line.

•**Start-Up Packages:** GTUS® Inks offers start-up assistance and complimentary start-up kits to assist with the conversion to GTUS® Inks so you can begin using superior inks and start saving immediately.

Equipment Solutions

- **Inkjet Systems:** GTUS® sells new and used inkjet systems for integration on your web or transport base. We provide System upgrades to your existing equipment, and also provide peripheral devices such as vision systems, magnetic encoders, labeling solutions, and custom inks.
- **Web Press:** GTUS® has an alliance with the Telstar Engineering to provide custom solutions for your web press. As “Press Performance Specialists”, Telstar can design and build from a full-frame web press to a unique retrofit component to work in-line with your web.
- **Transport Bases:** GTUS® has alliances with Pack-Smart and Profold to provide custom solutions for your digital printing requirements. Both Packsmart and Profold have extensive expertise and years of experience in the packaging, mailing and card personalization industries.
